

## [Character\_Builder]

This App will provide the option for users to create, store, and maintain custom characters, campaigns, and subclasses using the D&D 5e API. This API details the monsters, spells, and other character options particular to the 5th edition of the tabletop game Dungeons & Dragons.

### **Requirements**

#### **Users can**

- register.
- login and logout.
- update their information.
- access D&D 5th Edition API to get monsters, spells, and character options.
- store and view created characters.
- create subclasses options that persist with the character (customized not shared).
- create multiple characters.
- export their characters to a PDF.

#### **Stretch Goals:**

- Users can create and run mock battles.
